The complete

teaching journey companion

For Teachers,

**School PT** 

## For teacher's aspirations

## For teacher's endeavors

### For teacher's pursuit

The dream scenario for many teachers: a classroom where every student actively engages in the learning process.

Taking proactive steps to address this long-standing aspiration, School PT pioneered a solution. Leveraging an extensive knowledge map built upon 12 years of accumulated learning data, School PT empowers teachers with real-time monitoring capabilities.

This enables teachers to instantly assess individual students' pre-learning levels, provide targeted encouragement for independent learning, and ultimately, effectively lead class participation. Beyond the classroom, the teacher's unwavering passion to pass on the torch of learning continues.

School PT embraces and amplifies this dedication through technology. Empowering teachers as architects of their own lessons, it equips them with a vast library of high-quality content and curriculum materials, meticulously curated and readily available. The whole class can experience a uniquely tailored lesson for each and every student. Bridging learning gaps and fostering independent learning beyond the classroom remain ongoing priorities for teachers.

School PT aims to break down physical barriers and foster closer teacher-student connections, allowing students to receive essential support whenever they need it.

#### School PT in the classroom: Teacher Reviews

Compared to paper textbooks, School PT's real-time dashboard makes tracking progress and engagement a breeze. Teaching just got more streamlined, keeping me and my students in the loop. Simply convenient.

> Ms. Lee from Sangdo Middle School (Seoul, Korea)

A notable shift. Interactive content is drawing in quieter voices, and even previously reserved students are finding their way to participate. Learning is no longer a solo activity - the classroom feels like a hub of shared discovery now.

Ms. Im from Deokhwa Middle School (Daegu, Korea)

I've explored many EdTech tools, but their initial spark usually dimmed throughout the school year. School PT, however, was exceptional. Its management system took my teaching experience to another level, boosting student engagement and completion rates. This noticeable improvement has been very rewarding.

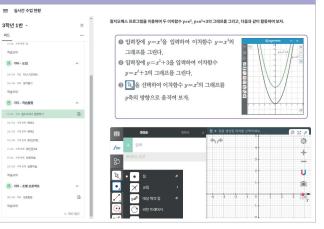

> Mr. Baek from Namsan High School (Daegu, Korea)
